

Welcome to our nightmare voyage through existential dimensions of pain. We searched the world for the best recording studios and spent months in post-production fine tuning to ensure every buzz, crackle and squeal of feedback came across exactly as we intended. Several of the tracks were recorded under the influence of peyote. Others were the result of wandering through scrub deserts for weeks without food or water. Live tracks were assembled from in-concert performances at nightclubs throughout the Lee Vining and Mono Lake areas. We'd like to apologize to anyone who may survive listening through the whole album.
